FOR IMMEDIATE RELEASE:

Gas Innovations Celebrates New, Expanded Facility with “Open House” for Suppliers, Clients and Community

La Porte, Texas (Houston) July 13, 2008 — Gas Innovations formally opened its new, expanded facilities this summer with a 3-day “open house” celebration. More than 200 guests—including local dignitaries, distributors and suppliers—toured the facility, enjoyed dinner, and learned about the far-reaching capabilities of the innovative gas and equipment supplier.

The event featured numerous displays and demonstrations of Gas Innovations’ Kobelco Welding Flux core products, Worthington Cylinders, Hydrocarbon Gases, Quality Control analytical equipment and the Ultra Sonic Cylinder recertification process. Additional suppliers participated in the demonstrations of cylinder gas packs, tube trailers and new portable cryogenic vessels.

Gas Innovations employees, dignitaries from La Porte City Council, Economic Development and Chamber of Commerce.
