

PETROCHEM SUPPORT GASES, SERVICES & SPECIAL APPLICATIONS

Gas Innovations is a world leading supplier of high purity gases to the petroleum refining, chemical processing, and oil & gas pipeline industries with emphasis on hydrocarbon needs. We utilize our expansive fleet of cylinders, tube trailers, ISO containers and pumper transports to fulfill most project requirements. Ancillary services and products offered include technical consultation, equipment, and turnkey logistics to satisfy your business needs. We are strategically located at the Port of Houston.

PACKAGING

- Butane
- Butenes
- Carbon Monoxide
- Compressed Natural Gas (CNG)
- Ethane
- Ethylene
- Hydrogen
- Hydrogen Chloride, Anhydrous (HCl)
- Isobutane
- Liquefied Natural Gas (LNG)
- Methane
- Nitrogen
- Pentanes
- Propane
- Propylene
- Other hydrocarbons available upon request

VIRTUAL PIPELINE

Supplemental gas supply during pipeline outages and interruptions

FLARE SUPPORT

Supplemental natural gas supply to support flaring requirements

INDUSTRIAL REFRIGERATION

High purity, low moisture hydrocarbon refrigerants to support chillers, evaporators, heat exchangers, and other refrigeration needs

FUEL BLENDING

Pure hydrocarbons available to produce optimal fuel blends

FLOW & PRESSURE MANAGEMENT

Connecting equipment, manifolds and regulation to match flow requirements

PLANT START UP & TURNAROUND

High purity hydrocarbons available in packages ranging from cylinders to bulk delivery
