Features and typical fields of application

- This product line has been designed for flat and horizontal position welding of austenitic stainless steel with reduced hexavalent chromium emission in its welding fume over conventional wires.
- The reduction of the emission contributes to a safer environment by reducing the potential exposure to hexavalent chromium in your shop or working environment.

Note: Occupational Safety and Health Administration (OSHA) requires the exposure limit of hexavalent chromium less than 0.005mg/m³

- Excellent performance in the flat and horizontal positions with either 75%Ar-25%CO₂ gas or 100%CO₂ shielding gas
